Buying GREENBTC (GBTC). The process is very simple. First you will need your own personal digital wallet. Your personal wallet address is used to carry out GREENBTC (GBTC) token transactions. We recommend using MetaMask. It's free and compatible with Uniswap DEX (Decentralized exchange). This is the exchange where GREENBTC (GBTC) transactions are carried out i.e. Buy, Sell, Trade, Swap.

MetaMask is a browser extension and a mobile app that equips you with a key vault, secure login, token wallet, and token exchange—everything you need to manage your personal digital assets.

GREENBTC (GBTC)

Its Global objectives are:

Preservation: Planet /Habitat /Species (46% token allocation)

GREENBTC (GBTC). A 100% green crypto created to raise the huge sums of money needed to help fund new and existing environmental projects and programs on a global scale. Global warming is advancing at an unprecedented rate and challenging our very existence on this wonderful planet.

A true Climate Crisis is upon us, it is called... ***The 6th Mass Extinction Event!***

Prosperity for People (45% token allocation)

The second objective is to give everyone the opportunity to gain financial independence and help them overcome 'climate apartheid' (sky rocketing prices in energy, food, water), plus increases in taxes and inflation, affecting lifestyle.

"If you see the value in our green crypto token and the benefits it can bring to both humans and the planet, then we invite you to join us today and enjoy the many benefits".
